Why K SCAN?

K SCAN makes scanning fast and easy for dentists and assistants ensuring optimal comfort for patients and reduced chair time.

A scan of the entire mouth takes, other than taking physical impressions, no longer than 5 minutes.

It creates high quality digital impressions in lifelike colors to evaluate the treatment and to enable dentists to better engage with their patients.

Your Benefits

K SCAN's simple software makes it easy for new adopters to IOS to start with. The open data system of K SCAN allows dentists to save the scans in different formats and use them flexibly.

The fast electronic transmission of the scans ensures that K Line can start the production of your Clear Aligners much faster than if you send physical impressions.

K SCAN comes with a 2-year warranty and no hidden costs. K Line will help dentists with the set-up and the first steps.

Technical specifications

Product type

Portable Intraoral Scanner

Output format

STL PLY OBJ

Anti-fog technology

Built-in module

Sensor

High speed CMOS

Disinfection methods

121 & 134 autoclavable

Splicing technology

Imaging Technique Accur-3D

Scan mode

3D Video scanning

Scan Speed

5 minutes

Scan depth of field

15 mm

Length of connecting cable

2 m

Scanner tip

18.5mm(H) x 19mm(W)

Weight

350 g

Connection

USB 3.0

Scanner dimensions

240mm(L) x 39.8mm(W) x 57mm(H)
